

Please consider the importance of keeping the U.S. airwaves free of corporate meddling and interference. As it stands today, the American people have been swerved and misled by the corporate giants like Murdoch's Fox News, GE and Clear Channel Broadcasting by furthering their own corporate agendas and prejudices to kiss up to the right-wing Neo-Con ayatollahs extant in our political scene. Sun Myung Moon has ruined a once-great newspaper by quietly pulling strings to work his agenda on news from Washington...don't allow the monolithic media to become a reality by giving permission to those with the most cash and political clout, thereby rendering what we hear and see as just another government media organ not to be trusted.
